syngenta *flowers*

Introduction

Welcome to Syngenta Flowers Cyclamen catalogue 2013. With this year's assortment, we continue our tradition of offering innovations tailored to consumer trends and growers' needs.

We aim to be a leader in Cyclamen: we introduced the first ever F1 hybrid Cyclamen some 30 years ago, and were the first to develop silver leaf types in mini, midi and large flowered varieties. Other innovations include our Friller series that flowers up to 3 weeks earlier than other series in this type. This means you can grow these varieties on the same schedule as standard large flowered Cyclamen. And last year, we introduced the new Snowridge Mini – the first mini Cyclamen with a striking white edge to the flowers. This year you find our first extra large flowered Snowridge Maxi Purple and we add the beautiful Pink to the exclusive Fleur en Vogue series.

Our innovations go beyond new varieties and series. Our unique Plantelligenz™ system helps you create a better “navigation plan” to reach the required flowering moment for your Cyclamen crop. And our Technical Team is always available for specialist support. Call on their in-depth knowledge of Cyclamen cultivation to make the most of our genetics, whatever your climate and growing conditions are.

Positioning of Syngenta Flowers Cyclamen

Syngenta Flowers' assortment can be divided by flower size into mini, intermediate and large flowered types. Within each segment, we have bred series for various pot sizes and for the different flowering seasons. Use the table below to select the series best suited for each season.

Legenda

-  = silver leaved
 = green leaved

Flowering Period

Mini

6 to 12 cm pot

Midi

10 to 14 cm pot

Large

11 to 19 cm pot

June - October

Zanetto®

- most compact mini series in the market
- many very small leaves

Libretto®

- typical mini Cyclamen with compact plants
- wide color range

Midori

- heat tolerant series
- compact growing
- many flowers centrally in the plant

Canto®

- compact version of the intermediate flower size types
- especially suited for Summer and early Autumn

Perfetto

- most compact large flowered Cyclamen for mass production
- short culture time
- great uniformity
- short flower stems

Sierra

- standard large flowered Cyclamen for Autumn production
- very early and uniform flowering

June - March

Snowridge Mini

- first mini Cyclamen with striking white edged flowers
- suitable for all year round production
- for indoor and outdoor use

Friller®

- earliest, large flowered fringed type in the market
- special flower shape

Snowridge Maxi

- round plant habit with many leaves
- largest flower in this type

October - March

Silverado

- standard mini Cyclamen for silver leaved types
- strongest type for outdoor use
- ideal for indoor, especially at Christmas time

SilverHeart

- first series with special leaf pattern
- showing the heart shape in silver color

Miracle

- large color range
- for Autumn and Winter production

Winfall®

- ideal series for Autumn and Winter production
- good Botrytis tolerance
- easy growing under low light and low temperatures

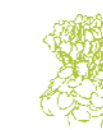

Laser

- intermediate flower size on a compact plant
- earliest and most uniform series in the market for Autumn and Winter

Sterling®

- the silver leaved version for Autumn and Winter production

Concerto®

- florist quality Cyclamen plant
- for late Summer and early Autumn production

Rainier

- the best large flowered Cyclamen for Autumn and Winter production
- grows at low temperatures and under lower light conditions

Winter Ice

- real unique large flowered type
- silver leaved and strong colors for a great color contrast
- Ideal for Christmas sales

Fleur en Vogue

- real unique variety
- novel flower shape that gives the plants a true exclusive look
- large, umbrella shaped flowers with clear white center
- exclusive design label

Selection Table

⁽¹⁾ Large flowered are also suited for outdoor use in Southern European weather conditions. For Northern Europe outdoor use we recommend mini and intermediate types

Friller®	12-16 cm		medium	2 ⁽¹⁾	34	October - December
Fleur en Vogue	12-16 cm		medium	2 ⁽¹⁾	33	October - December

The total culture time of Cyclamen depends on the series, and the time from potting to flowering depends on the plug size. The table below is designed to help with scheduling the right flowering moment. It gives guidance on the sowing and potting dates for each season and series. Culture time is subject to local growing conditions and can vary depending on location. For more detailed guidance, please consult our Cyclamen crop manual or contact one of our crop specialists.

Libretto®

Libretto® is a typical mini Cyclamen with compact plants for Summer and Autumn production in 9 -11 cm pots with a wide color range.

Colors: 15
Mixes: 2

Grower benefits

- Large number of colors: 15
- Compact plants with many small leaves give a lot of flowers
- Ball shaped plants for more plants per m²

Retailers benefits

- Many flowers per plant for great sales appeal
- Round shaped plants give a better shelf-life
- Large range of colors and mixes

Midori

Midori is the mini Cyclamen for Summer and early Autumn production. This heat tolerant series grows compact and develops many flowers centrally in the plant.

Colors: 13

Mixes: 1

Grower benefits

- Heat tolerant so easier to grow in Summer and early Autumn.
- Compact plants for more plants per m²
- Many small leaves give many flowers

Retailers benefits

- Easy to sell plants with many flowers
- Wide range of solid colors and spectacular flame types
- The Midori Scarlet has the most intense Red color of all Cyclamen

Snowridge Mini

The first mini Cyclamen with the striking white edged flowers. Suitable for all year round production, for both indoor and outdoor use in pot size 9 – 12 cm.

Colors: 2

Grower benefits

- Compact plants with many small leaves allow for high density growing
- Very strong petals reduce the risks of Botrytis damage
- Very early flowering, can be grown with same timing as Midori and Winfall®

Retailers benefits

- New flower pattern creates interest from consumers
- Unique flowers give special pricing opportunities

Miracle

Miracle is the mini Cyclamen series with a large color range, suitable for Autumn and Winter production in 10 – 12 cm pots.

Colors: 10
Mixes: 2

Grower benefits

- Large color range (10!) for optimal color mix
- Fills the pot at lower temperatures and low light conditions
- Open plant habit for less Botrytis problems

Retailers benefits

- Large range of colors, including nice flame for great sales appeal
- Very free flowering, strong color impact
- Many colors are scented

White

Winfall®

The ideal series for Autumn and Winter production thanks to the good Botrytis tolerance and the easy growing under low light and low temperatures. Should not be potted before week 24!

Colors: 8
Mixes: 1

Grower benefits

- Open, but still compact plant habit limits the risks for Botrytis
- Grows also under lower light and lower temperatures, allowing the grower to save on energy costs
- Culture time 2 weeks shorter than main competitor varieties

Retailers benefits

- Botrytis tolerance will result in a better shelf-life and less shrinkage
- Bright colors on very dark leaves give a nice contrast

Silverado

The standard mini Cyclamen for silver leaved types. Ideal for indoor, especially at Christmas time, and the strongest type for outdoor use.

Colors: 5
Mixes: 2

Grower benefits

- Uniformity in earliness between all colors make planning more easy
- Earliest flowering series for more efficient use of greenhouse space

Retailers benefits

- Strong silver leaf give consumers extra choice in Cyclamen
- Beautiful contrast between leave color and flower will attract consumers
- Can be advised for outdoor use from August till October

White Imp.

SilverHeart

The first Cyclamen series with special leaf pattern, showing the heart shape in silver color. Suitable for Autumn and Winter production in pot size 10 – 12 cm.

Colors: 5
Mixes: 2

Grower benefits

- Specialty item allow grower to offer something different from competitors
- Very uniform series for easy planning

Retailers benefits

- Special heart shape pattern gives opportunities for special promotion actions (Valentine's Day)

Products for protection of Cyclamen

Fungicides:

Daconil

- Preventative fungicide against a broad spectrum of diseases
- Binds strong to the wax layer which results in a quick and good rainfastness
- Multi-site mode of action is effective in resistance management programs
- Other brands: Bravo

Ortiva

- Preventative fungicide against a broad spectrum of diseases
- Long lasting efficacy
- The only systemic strobilurin, also effective against leafspots
- Other brands: Heritage, Amistar

Ridomil Gold

- Fast systemic uptake by roots and leaves results in protection of the whole plant
- Very effective against Phytophthora and Phytophthora, improving root quality
- Long lasting efficacy reduces plant loss
- Protective and curative action
- Other brands: Fongonil, Fongonil Gold, Subdue, Subdue Gold

Switch

- Excellent control of Botrytis
- Two active ingredients: Contact and translaminar protection
- Effective in resistance management programs
- Other brands: Botryl

Insecticides:

Actara

- Controls a broad spectrum of pests in one go, reducing total number of sprays in a year
- Acts fast with a long lasting efficacy, improving your plant quality
- Systemic uptake by roots and leaves results in protection of the whole plant
- Compatible with predatory mites, so helping an integrated crop program to be successful
- Other brands: Flagship

Pirimor

- Fast control of almost all aphid species
- Control by contact, uptake and damp action
- Very good compatible with beneficial insects in integrated programs

Plenum

- Stops aphids and whiteflies from feeding
- Systemic action to protect plants from the inside out
- Very good compatible with beneficial insects in integrated programs
- Other brands: Chess

Proclaim

- Controls a broad spectrum of caterpillars
- Fast uptake in the leaf by translaminar activity so also 'hidden' caterpillars are controlled
- Active ingredient derived from nature

Vertimec

- Broad spectrum insecticide against thrips and spidermites
- Fast uptake in the leaf by translaminar activity
- Other Brands: Vertimec Gold, Hortimec

Plantelligenz™

The Syngenta Flowers tool supporting growers by predicting the Cyclamen flowering time based on hard data.

Plantelligenz™ offers you reliable flowering prediction time wherever you are located

Plantelligenz™ is build on:

- Syngenta Flowers genetics
- Many years of collected data
- The technical knowledge of our experts

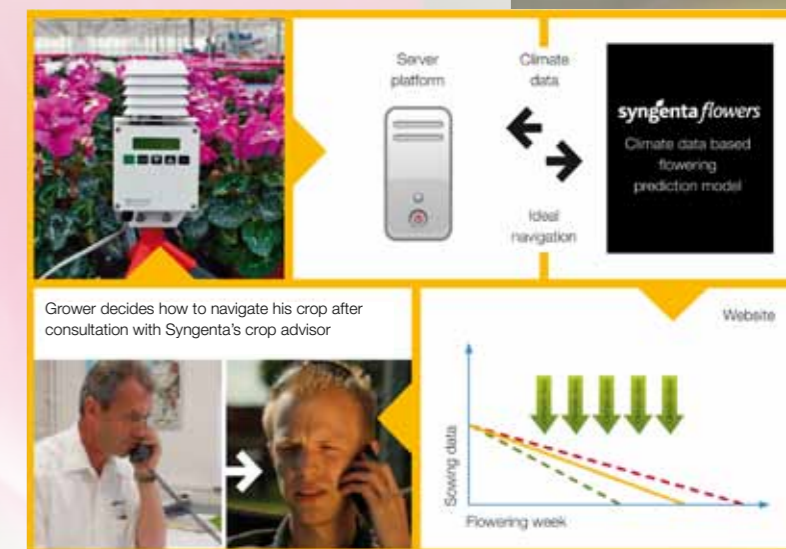

With Plantelligenz™

- You can make your growing decisions based on data instead of intuition
- You can become a reliable supplier for retailers, always delivering in time
- You can make more profit by selling a higher % number of plants, whilst reducing your shrink

Plantelligenz™ helps you to make good decisions 24/7 according to your customers needs.
